EDUCATION

University od Dundee <i>MSc Business Analytics and finance</i>	Dundee, UK <i>Graduation Date: Jan 2026</i>
Jamia Milla Islamia <i>BBS and MBA in Marcketing and Operations</i>	Delhi, India <i>Graduation Date: Jun 2014</i>
Bakhter High School of Balkh <i>High School</i>	Balkh, Afghanistan <i>Graduation Date: Mar 2004</i>

WORK EXPERIENCE

Kanthal -Alleima LTD <i>Production Operative</i> - Collaborate with key client First Solar to manufacture Globar components to exact industry standards. - Operate specialized infrared monitoring software to maintain precise quality control during production. - Leverage Analytical tools, advanced Excel, and statistical modeling to analyze production data and ensure all products consistently meet high-quality performance benchmarks.	Perth- Scotland, UK <i>Feb 2026 - Present</i>
The iOutlet UK <i>Data Analyst intern</i> - Designed and implemented automated data pipelines using Excel, Python and analytical tools to process large-scale transaction datasets, improving research workflow efficiency. - Developed interactive dashboards and visualizations to track key performance trends, providing actionable insights to support business decision-making. - Applied AI-driven research methods to validate and analyze complex data, ensuring 100% data integrity and enhancing the accuracy of monthly performance reports.	Dundee- Scotland, UK <i>May 2025 - Jul 2025</i>
Embassy of Afghanistan in India <i>Administrative and Systems officer</i> - Managed and reconciled high-volume databases and sensitive financial records, ensuring 100% data integrity and strict compliance with operational standards. - Streamlined complex data input workflows by implementing structured formatting and archival systems, resulting in a 40% reduction in processing times. - Synthesized diverse operational data into accurate, comprehensive reports and collaborated with internal and external stakeholders to deliver precise insights for organizational decision-making.	Delhi, India <i>Dec 2019 - Nov 2024</i>

KEY ACADEMIC PROJECTS

University of Dundee <i>Projects</i> <i>Risk Management & Financial Applications:</i> Built market risk models to calculate Value-at-Risk (VaR) and perform stress testing on volatile portfolios, simulating potential losses to support strategic investment decisions. <i>AI-Driven Financial Research:</i> Developed predictive machine learning models to analyze financial sentiment and market trends, utilizing LLMs to automate research workflows and enhance data-driven decision-making. <i>Quantitative Data Analysis:</i> Leveraged Python and R to perform deep-dive analysis on complex financial datasets, identifying key patterns in asset performance and translating statistical results into actionable insights for portfolio management.	Dundee-Scotland, UK <i>Jan 2025 - Jan 2026</i>
